ARTIFICIAL TURF

CRUFTS

Product	JUTA AGILITY ARTIFICIAL GRASS	2 000 m ²
Location	Birmingham, England	
Installation	2017	

JUTA UK is delighted to have provided Crufts with an outstanding synthetic surface for such a prestigious and well respected event within the Dog Agility community.

For a long time we have been noticing common weaknesses of classic sports surfaces – too much hardness or softness, high moisture levels, dust, mud, durability, maintenance needs and constant play characteristics. With JUTAgass all these issues are a thing of the past. Having a great amount of previous experience with the construction of Synthetic turf for many applications, it was a triumph to provide a surface that exceeds the demands an agility surface requires.

JUTAgass was installed throughout the show including the main arena, and the 'Young Kennel Club' agility area. We also supplied the press/interview area also to keep up the professional theme.

The total coverage was just over 2 000 m².

Crufts is one of the largest dog events in the world. No longer purely a dog show, Crufts celebrates every aspect of the role that dogs play in our lives. The event is organised and hosted by the Kennel Club. It is held over four days in early March at the National Exhibition Centre (NEC) in Birmingham, England.

Being the highest profile dog show in British culture JUTAgass maintained a high standard allowing the dogs and owners to strut their stuff on the now prestigious Agility surface. After hearing such great feedback on the performance means we can expect nothing but the very best from the experts at Crufts.

JUTAgass is a fully integrated producer of Synthetic Grass, and we manufacture all components from the raw material through to the finished product. JUTAgass works alongside and supports those in the industry that are also dedicated to using a quality product. Each year, JUTAgass produces over 2.4 million square metres that is exported worldwide. As a vertically integrated producer, JUTAgass is able to control each step of the production process, ensuring a high quality end product is delivered to every project. The JUTAgass range consists of products that are suitable for the domestic, commercial, play and sports markets with a wide selection of market leading characteristics and benefits.

If the experts at Crufts think it is good enough for the best dogs in the world then why not consider installing JUTAgass for your perfect pooch?
