A long track record with a history to be proud of.

With an impressive history that stretches back to the second half of the 19th Century, JUTA originally specialised in the production of thread, cloth, sacking, twine and rope from natural materials.

The JUTA brand itself was established back in 1946, and the organisation has since grown to become one of the world's most respected manufacturers of technological fabrics and synthetic products.

With its global headquarters in the Czech Republic, JUTA now employs over 2,000 people and has 14 state-of-the-art production facilities across Europe and beyond.

Vertically Integrated for End-to-End Quality

JUTA's core business centres around the extrusion of polymers for membranes, fibres and twine and the subsequent processing of these materials into high quality finished products for a range of markets.

One of the key's to JUTA's ongoing success is its vertical integration. Its operations encompass everything from the processing of basic chemicals, polymers and raw materials to the development of high quality fibres and woven fabrics which are ultimately used in the final product. This innovative approach, combined with the latest manufacturing technology, enables the company to ensure consistently high quality across the entire production process.

Investment in Manufacturing with the Flexibility to Adapt

At JUTA we pride ourselves on the quality and flexibility of our manufacturing and our commitment to innovation. Our highly advanced facilities have been designed so that we can respond quickly to changes in demand and continue to deliver exactly what the market needs. Furthermore, our ongoing investment in the latest technologies means that we continually set the benchmark for others to follow, exceeding expectations and providing our customers with an unrivalled level of reassurance.

We also recognise the impact that our operations may have on the environment, and work hard to use resources efficiently, reduce waste and ultimately produce sustainable products. JUTA's commitment to ongoing improvement in this area has been officially recognised with our ISO 14001 Accreditation.

Expertise to Advice on the Best Solution

At JUTA we understand that good people and outstanding service are just as important as quality products. We have an ongoing commitment to investing in people, and are proud to boast a global team of highly experienced professionals that understand both our products and the industries in which they will be used.

From research and development through to manufacturing, logistics and ongoing technical support, JUTA employees are dedicated to standing out from the crowd. That's why, when you work with JUTA, you will experience first class service and a commitment to provide the best long term solution for your particular requirements.

An Impressive Portfolio of Products

JUTA's range of products has grown to include solutions for the construction, manufacturing, agricultural and landscaping sectors. Under our dedicated divisions, we are able to offer a range of highly engineered products:

A range of solutions for the agricultural industry, including:

- Ground protection materials
- Packing and baling solutions
- Wrapping and bagging products

Quality artificial grass designed for a range of applications, including:

- Home and Commercial Landscaping
- Sports and leisure facilities
- Exhibition and other bespoke use

High performance products for the construction sector, including:

- Geomembranes and gas barriers
- Geotextiles and ground stabilisers
- Roofing and drainage materials

“Our ongoing investment in the latest technologies means that we continually set the benchmark for others to follow”
